

The Maryland Department of Health invites all healthcare workers and environmental services staff to the Centers for Disease Control and Prevention's Project Firstline!

CDC's Project Firstline aims to provide engaging, innovative and effective infection control training for frontline healthcare workers and members of the public health workforce.

Visit the MDH Project Firstline site and select the **FREE** infection control courses that work best for you. Certificates of Completion are awarded for each of the seven courses. Complete instructions, including how to earn CMEs, CNEs or CPEs, are posted on the site.

We can also provide a **FREE** in-person or virtual instructor if you would prefer a group training session. Complete a Request Form and we will work with you to plan your session.

If you have any questions, please email mdfirstline@hqi.solutions.
